

PS-12DC-EU - AUG 28, 2018

Item # PS-12DC-EU was discontinued on AUG 28, 2018. For informational purposes, this is a copy of the website content at that time and is valid only for the stated product.

PRECISION CONSTANT CURRENT LASER DRIVERS

- ▶ Zener & Schottky Diode Protection
- ▶ 250 mA and 2.5 A Versions
- ▶ RoHS Compliant Drivers Available

LD3000R

LD1255R

Application Idea

LD1255R
 Mounted on an LD1255P
 (Power Supply Not Included)

OVERVIEW

The LD1255R (250 mA) is a low-noise, highly-stable, constant-current laser diode driver. The LD3000R is a higher-power (2.5 A) version of the LD1255R. These laser drivers are also recommended for driving LEDs. Both laser current drivers fully support the A, D, and E pin configurations (shown below).

Item #	LD1255R	LD3000R
Operating Current	0.2 to 250 mA	0.02 to 2.5 A
Operating Mode	Constant Current	
Internal Current Control	12 Turn Potentiometer (On Board)	
External Current Control	0 to 5 Volt Analog Input Voltage	
Operating Voltage	±8 to 12 Volts	
Monitor Photodiode Transimpedance Gain	1000 V/A	

Note: The photodiode monitor circuits of the LD1255R and LD3000R only support lasers that have an isolated photodiode anode (i.e. the photodiode cathode connected to the laser anode). They will not work with common cathode lasers. CONNECTING THE PHOTODIODE OF THESE LASERS TO THE LD1255R or LD3000R WILL DESTROY THE LASER. The LD1255R and LD3000R will operate the laser portion of all common cathode lasers without any problems as long as the photodiode anode is not connected to the driver.

S P E C S

Item #	LD1255R
Operating Current	0.2 to 250 mA
Operating Mode	Constant Current
Internal Current Control	12 Turn Potentiometer (On Board)
External Current Control	0 to 5 V Analog Input Voltage
Output Current Drift	4.4 $\mu\text{A}/^\circ\text{C}$ (Typical)
Current Noise	<1 μA_{RMS}
Operating Voltage	± 8 to 12 V
Dimensions	2.45" x 1.03" (62.2 mm x 25.4 mm)
LD ESD Protection	Forward Voltage: 160 ms Slow-Start Circuit, 3.3 V Zener Diode, Reverse Voltage: Schottky Diode, LD DISABLE Pin
Signal Bandwidth	1.2 kHz
Monitor Photodiode	
Transimpedance Gain	1000 V/A
Max LD Forward Voltage	3.3 V
Operating Temperature	10 to 30 $^\circ\text{C}$
Storage Temperature	-20 to 50 $^\circ\text{C}$
Warm-up Time	30 Minutes

Item #	LD3000R
Operating Current	0.02 to 2.5 A
Operating Mode	Constant Current
Internal Current Control	12 Turn Potentiometer (On Board)
External Current Control	0 to 5 V Analog Input Voltage
Operating Voltage	± 8 to 12 V
Dimensions	3.6" x 1.3" (91.4 mm x 33.0 mm)
Monitor Photodiode	
Transimpedance Gain	1000 V/A
Operating Temperature	10 to 30 $^\circ\text{C}$
Storage Temperature	-20 to 50 $^\circ\text{C}$
Warm-up Time	30 Minutes

PIN DIAGRAMS

LD1255R Top View

LD3000R Top View

LD1255R Pin Designations

Pin	Function
J1-1	+V (+8 to +12 VDC, 10 mA)
J1-2	Common
J1-3	-V (-8 to -12 VDC, 0.3A) Provides Power to Laser
J1-4	External Current Control (0 to +5 V)
J1-5	Disable
J1-6	Laser Diode Anode
J1-7	Laser Diode Cathode
J1-8	Monitor Photo Diode Anode (From Laser) ^a
J1-9	Photodiode Monitor Output (-1 V/mA)
J1-10	Laser Current Monitor Output (10 mV/mA)

- The LD1255R photodiode monitor circuit only supports lasers that have a photodiode with an isolated anode. It will not support common cathode lasers such as the CQL7825/D and CQL7840/D.

J2 Pins to Jumper	Operating Mode
1 to 2	Mode 1. COMMON Referenced External Current Control
2 to 3	Mode 2. Disable External Current Control

LD3000R Pin Designations

Pin	Function
J1-1	+V (+5 to +12 VDC, 50 mA)
J1-2	Ground
J1-3	-V (-8 to -12 VDC, 2.5A) Provides Power to Laser
J1-4	External Current Control (0 to +5 V)
J1-5	No Contact (Polarization Key)
J1-6	Laser Diode Anode (Internally Connected to Pin 2 Ground)
J1-7	Laser Diode Cathode
J1-8	Monitor Photo Diode Anode (From Laser) ^a
J1-9	Photodiode Monitor Output (-1 V/mA)
J1-10	Laser Current Monitor Output (1 V/A)

- The photodiode monitor circuit of the LD3000R only supports lasers that have an isolated photodiode anode (i.e. the photodiode cathode connected to the laser anode). It will not work with common cathode lasers. CONNECTING THE PHOTODIODE OF THESE LASERS TO THE LD3000R WILL DESTROY THE LASER. The LD3000R will operate the laser portion of all common cathode lasers without any problems as long as the photodiode anode is not connected to the driver.

J2 Pins to Jumper	Operating Mode
2 to 3	Mode 1. COMMON Referenced External Current Control
4 to 5	Mode 2. Disable External Current Control

IMPORTANT! Do not operate the LD3000R without a jumper installed on J2. Your laser may be overdriven and permanently damaged.

Remaining J2 Pins	Function
1	No Connection (Leave This Pin Floating)
5	-V (May Also Be Used for Monitoring Signals)

SMART PACK

Smart Pack

- Reduce Weight of Packaging Materials
- Increase Usage of Recyclable Packing Materials
- Improve Packing Integrity
- Decrease Shipping Costs

Click to Enlarge
LD3000R Packaging

Item #	% Weight Reduction	CO ₂ -Equivalent Reduction ^a
LD3000R	15.26%	1.32 kg

Thorlabs' Smart Pack Initiative is aimed at waste minimization while

still maintaining adequate protection for our products. By eliminating any unnecessary packaging, implementing packaging design changes, and utilizing eco-friendly packaging materials for our customers when possible, this initiative seeks to improve the environmental impact of our product packaging. Products listed above are now shipped in re-engineered packaging that minimizes the weight and the use of non-recyclable materials.^b As we move through our product line, we will indicate re-engineered packages with our Smart Pack logo.

- Travel-based emissions reduction calculations are estimated based on the total weight reduction of packaging materials used for all of 2013's product sales, traveling 1,000 miles on an airplane, to provide general understanding of the impact of packaging material reduction. Calculations were made using the EPA's shipping emissions values for different modes of transport.
- Some Smart Pack products may show a negative weight reduction percentage as the substitution of greener packaging materials, such as the Greenwrap, at times slightly increases the weight of the product packaging.

SELECTION GUIDE

Laser Diode Controller Selection Guide

The tables below are designed to give a quick overview of the key specifications for our laser diode controllers and dual diode/temperature controllers. For more details and specifications, or to order a specific item, click on the appropriate item number below.

Current Controllers						
Item #	Drive Current	Compliance Voltage	CC ^a	CP ^b	Modulation	Package

- Constant current.
- Constant power.
- Combined controller and mount for pigtailed laser diodes in TO can packages with A, D, E, or G pin codes only.

- Combined controller and mount for pigtailed laser diodes in TO can packages with B, C, or H pin codes only.
- Combined controller and mount for laser diodes in butterfly packages only.
- Enhanced compliance voltage for QCL operation.

We also offer a variety of OEM and rack-mounted laser diode current & temperature controllers (OEM Modules, TXP Rack Modules, PRO8 Current Control Rack Modules, and PRO8 Current and Temperature Control Rack Modules).

OEM Precision Constant Current Driver: 250 mA, 3.3 V

- ▶ Low Current Noise ($<1 \mu\text{A}_{\text{RMS}}$)
- ▶ Low Temperature Drift
- ▶ On-Board 12-Turn Laser Current Control
- ▶ External Input for Laser Current Control
- ▶ Monitor Output for Laser Current and Photodiode Current
- ▶ Laser Disable Pin
- ▶ Slow-Start Circuit for Laser Protection
- ▶ LD1255P Allows Mounting to an Optical Table or Breadboard
- ▶ Size: 2.45" x 1.03" (62.2 mm x 25.4 mm)
- ▶ RoHS-Compliant

The LD1255R is a low-noise, ultra-stable, constant-current laser diode driver. It supplies up to 250 mA of drive current, supports laser pin configurations A, D, and E, and is ideally suited for demanding diode laser applications such as operating a laser diode in an external cavity tunable laser. This second-generation laser diode driver includes on-board Zener and Schottky diode protection as well as a disable pin. The op-amp and voltage reference design enables more precise laser current control. The LD1255P Mounting Plate, which features 8-32 and M4 taps for post mounting, allows the LD1255R to be secured to a breadboard or optical table.

Part Number	Description	Price	Availability
LD1255R	250 mA Precision Constant Current Laser Driver, RoHS Compliant	\$155.04	Today
LD1255P	LD1255R Optical Table Mounting Plate	\$25.19	Today

OEM Precision Constant Current Driver: 2.5 A, 7.7 V

- ▶ Low Noise $12 \mu\text{A}_{\text{RMS}}$ at 1.0 A
- ▶ On-Board 12-Turn Current Control
- ▶ External Input for Current Control
- ▶ Monitor Outputs for Diode and Photodiode Current
- ▶ Low Noise 2.5 A Drive Current
- ▶ Slow-Start Circuit for Laser Protection
- ▶ RoHS-Compliant

The LD3000R driver is a higher-power version of Thorlabs' popular LD1255R ultra-stable, low-noise laser diode driver featured above. It utilizes high-current components, supplies 2.5 A, and supports pin configurations A, D, and E. The aluminum housing allows additional heat sinking, which results in a highly stable laser diode driver in a relatively small package. This device can operate both LEDs and laser diodes.

Part Number	Description	Price	Availability
LD3000R	Laser Diode Driver, 2.5 A Constant Current	\$167.28	Today

OEM Board Level Driver Power Supplies & Cables

- ▶ Two 12 VDC Power Supply Options: 110/120 VAC and 220/240 VAC
- ▶ Cable Connects Driver (LD1255R) and Power Supply (PS-12DC)

The PS-12DC-EU and PS-12DC-US provide a stable ± 12 VDC output with up to ~ 300 mA of current, making these power supplies ideal for the LD1255R and LD1255P current drivers sold above. However, these power supplies are not recommended for use with the LD3000R due to the current requirements of this driver.

Part Number	Description	Price	Availability
PS-12DC-EU	Power Supply, ± 12 VDC, 220-240 VAC	\$86.45	Lead Time
LD1255-CAB	LD1255R Power Supply Cable	\$17.65	Today
PS-12DC-US	Power Supply, ± 12 VDC, 110-120 VAC	\$70.13	Today
